JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Ab initio calculations
Facilitated alkali ion transfer at the water|1,2-dichloroethane interphase: ab initio calculations concerning alkaline metal cation–1,10-phenanthroline complexes 111
Acetonitrile solution
Ion pair formation between the electrogenerated 2,3-dichloro-5,6-dicyano-1,4-benzoquinone dianion and the sodium ion at platinum surfaces 193
ac impedance technique
An ac impedance study of the anodic dissolution of iron in sulfuric acid solutions containing hydrogen sulfide 11
Activated composite membrane
Characterization of novel activated composite membranes by impedance spectroscopy 173
Adsorption
A molecular model for polylayer formation on electrode surfaces 249
Alkali ion transfer
Facilitated alkali ion transfer at the water|1,2-dichloroethane interphase: ab initio calculations concerning alkaline metal cation–1,10-phenanthroline complexes 111
Alkaline media
Electrochemical, spectroscopic and structural investigations of the Cd|Cd(II) system in alkaline media. I. Cation effects 237
Amphiphiles
Self-assembly and catalytic properties of 1,1′-bridged-2,2′-dipyridinium amphiphiles 39
Analysis
A unified approach to trace analysis and evaluation of electrode kinetics with fast Fourier transform electrochemical instrumentation 129
Assisted ion transfer
Electrochemical extraction of heavy metal ions assisted by cyclic thioether ligands 29
Assisted ion transfer reactions
Facilitated ion transfer reactions across oil|water interfaces: Part II. Use of the convoluted current for the calculation of the association constants and for an amperometric determination of the stoichiometry of ML_j^{z+} complexes 59

Bifurcation analysis
Bifurcation to limit cycle oscillations induced by the ohmic potential drop during the anodic polarisation of iron in 14.8 M H_3PO_4 77
Brönsted reactions
Coupled chemistry revisited in the tentative cathodic electropolymerization of 2-butenenitrile 145
2-Butenenitrile
Coupled chemistry revisited in the tentative cathodic electropolymerization of 2-butenenitrile 145

Cadmium
Electrochemical extraction of heavy metal ions assisted by cyclic thioether ligands 29
Calix[4]arenes
Immobilisation at an electrode surface of calix[4]arenes bearing electropolymerisable pyrrole moieties at the upper rim 261
Catalytic properties
Self-assembly and catalytic properties of 1,1′-bridged-2,2′-dipyridinium amphiphiles 39
Catalytic reduction
Catalytic reduction of iodoethane by cobalt(I) salen electrogenerated at vitreous carbon cathodes 121
Cation effects
Electrochemical, spectroscopic and structural investigations of the Cd|Cd(II) system in alkaline media. I. Cation effects 237
Cd|Cd(II) system
Electrochemical, spectroscopic and structural investigations of the Cd|Cd(II) system in alkaline media. I. Cation effects 237
Charge transfer steps
On the theory of the coulostatic pulse technique as applied to redox electrodes with two consecutive charge transfer steps 19
CIMS
Coupled chemistry revisited in the tentative cathodic electropolymerization of 2-butenenitrile 145
Clusters
On the cathodic behaviour of tetraalkylammonium cations at a platinum electrode 5
Coating
A voltammetric and FTIR–ATR study of the electropolymerization of phenol on platinum electrodes in carbonate medium: Influence of sulfide 163
Cobalt(I) salen
Catalytic reduction of iodoethane by cobalt(I) salen electrogenerated at vitreous carbon cathodes 121
Column electrolysis
Continuous-flow column electrolytic spectroelectrochemistry for two-step one-electron transfer reactions 229
Copper
Electrochemical nucleation on microelectrodes. Theory and experiment for diffusion-controlled growth 101
Coulostatic pulse technique
On the theory of the coulostatic pulse technique as applied to redox electrodes with two consecutive charge transfer steps 19
Crotononitrile
Coupled chemistry revisited in the tentative cathodic electropolymerization of 2-butenenitrile 145
Current oscillations
Bifurcation to limit cycle oscillations induced by the ohmic potential drop during the anodic polarisation of iron in 14.8 M H_3PO_4 77
Cyclic voltammetry
Electrochemical study of a metallothionein related peptide in the presence of zinc using cyclic voltammetry 267
Facilitated ion transfer reactions across oil|water interfaces: Part II. Use of the convoluted current for the calculation of the association constants and for an amperometric determination of the stoichiometry of ML_j^{z+} complexes 59

PII S0022-0728(98)000201-0

Cyclodextrin complexes
The surface-enhanced Raman spectroelectrochemical study on the interaction between β-cyclodextrin and the electrochemically generated radical intermediate of flavin 187
Cytochrome *c*
The direct electrochemistry of cytochrome *c* at a hanging mercury drop electrode modified with 6-mercaptopurine 89

Dawson type polyanion
Electrochemical and electrocatalytic properties of iridium(IV)-substituted Dawson type polyoxotungstate 49
2,3-Dichloro-5,6-dicyano-1,4-benzoquinone
Ion pair formation between the electrogenerated 2,3-dichloro-5,6-dicyano-1,4-benzoquinone dianion and the sodium ion at platinum surfaces 193
Dicyclohexylcarbodiimide
Immobilisation at an electrode surface of calix[4]arenes bearing electropolymerisable pyrrole moieties at the upper rim 261
Doping/dedoping
In situ study of polypyrrole morphology by STM: effect of the doping state 273

Electrocatalytic reduction
Electrochemical and electrocatalytic properties of iridium(IV)-substituted Dawson type polyoxotungstate 49
Electrochemical
Electrochemical, spectroscopic and structural investigations of the Cd|Cd(II) system in alkaline media. I. Cation effects 237
Electrochemical methods
A voltammetric and FTIR–ATR study of the electropolymerization of phenol on platinum electrodes in carbonate medium: Influence of sulfide 163
Electrochemical nucleation
Spatial distribution of electrochemically deposited clusters: a simulation study 211
Electrochemical reduction
Electrocatalytic reduction of NO on metal electrodes and gas diffusion electrodes in an aqueous electrolyte 181
Ion pair formation between the electrogenerated 2,3-dichloro-5,6-dicyano-1,4-benzoquinone dianion and the sodium ion at platinum surfaces 193
Electrochemistry
The direct electrochemistry of cytochrome *c* at a hanging mercury drop electrode modified with 6-mercaptopurine 89
Electrode potential
Incorporation and expulsion of electrolyte species by tungsten trioxide-, WO_3 | Polyaniline-, and WO_3 | PAn | polyvinylsulfate-confined electrodes during potential cycling 219
Electrodes
Electrooxidation of ethylene glycol on a platinum doped polyaniline electrode 95
Electronic conducting polymer
In situ study of polypyrrole morphology by STM: effect of the doping state 273
Electrooxidation
Electrooxidation of ethylene glycol on a platinum doped polyaniline electrode 95
Electropolymerisation
Immobilisation at an electrode surface of calix[4]arenes bearing electropolymerisable pyrrole moieties at the upper rim 261
Electropolymerization
Coupled chemistry revisited in the tentative cathodic electropolymerization of 2-butenenitrile 145
Ethyl formate
A preliminary study of room temperature direct ethyl formate fuel cells for consumer electronic applications 1

Fe|14.8 M H_3PO_4 system
Bifurcation to limit cycle oscillations induced by the ohmic potential drop during the anodic polarisation of iron in 14.8 M H_3PO_4 77
Field–dipole interacions
A molecular model for polylayer formation on electrode surfaces 249
Flavin
The surface-enhanced Raman spectroelectrochemical study on the interaction between β-cyclodextrin and the electrochemically generated radical intermediate of flavin 187
Fourier transform ac voltammetry
A unified approach to trace analysis and evaluation of electrode kinetics with fast Fourier transform electrochemical instrumentation 129

Gas diffusion electrodes
Electrocatalytic reduction of NO on metal electrodes and gas diffusion electrodes in an aqueous electrolyte 181
Gelatine
Electrochemical nucleation on microelectrodes. Theory and experiment for diffusion-controlled growth 101
Glassy carbon electrodes
Catalytic reduction of iodoethane by cobalt(I) salen electrogenerated at vitreous carbon cathodes 121
Gold electrode
Kinetics of redox conversion at a gold electrode of water-insoluble ubiquinone ($UQ_{(10)}$) and plastoquinone ($PQ_{(9)}$) incorporated in supported phospholipid layers 139

Heavy metal ion
Electrochemical extraction of heavy metal ions assisted by cyclic thioether ligands 29
Heteropolyoxometalates
A voltammetric study on the formation of V(V)- and V(IV)-substituted molybdophosphate(V) complexes in aqueous solution 203
Heteropolytungstate
Electrochemical and electrocatalytic properties of iridium(IV)-substituted Dawson type polyoxotungstate 49
Hydrogen sulfide
An ac impedance study of the anodic dissolution of iron in sulfuric acid solutions containing hydrogen sulfide 11

Immobilisation
Immobilisation at an electrode surface of calix[4]arenes bearing electropolymerisable pyrrole moieties at the upper rim 261
Impedance analysis
A unified approach to trace analysis and evaluation of electrode kinetics with fast Fourier transform electrochemical instrumentation 129
Impedance spectroscopy
Characterization of novel activated composite membranes by impedance spectroscopy 173
Inductively coupled plasma spectroscopy
Characterization of novel activated composite membranes by impedance spectroscopy 173
Intermediate
An ac impedance study of the anodic dissolution of iron in sulfuric acid solutions containing hydrogen sulfide 11
Iodoethane
Catalytic reduction of iodoethane by cobalt(I) salen electrogenerated at vitreous carbon cathodes 121
Iridium
Electrochemical and electrocatalytic properties of iridium(IV)-substituted Dawson type polyoxotungstate 49

ITIES
Facilitated ion transfer reactions across oil|water interfaces: Part II. Use of the convoluted current for the calculation of the association constants and for an amperometric determination of the stoichiometry of ML_j^{z+} complexes 59

Lead
Electrochemical extraction of heavy metal ions assisted by cyclic thioether ligands 29
Facilitated ion transfer reactions across oil|water interfaces: Part II. Use of the convoluted current for the calculation of the association constants and for an amperometric determination of the stoichiometry of ML_j^{z+} complexes 59
Limit of detection
A unified approach to trace analysis and evaluation of electrode kinetics with fast Fourier transform electrochemical instrumentation 129
Liquid|liquid interface
Electrochemical extraction of heavy metal ions assisted by cyclic thioether ligands 29

Membrane characterization
Characterization of novel activated composite membranes by impedance spectroscopy 173
6-Mercaptopurine
The direct electrochemistry of cytochrome *c* at a hanging mercury drop electrode modified with 6-mercaptopurine 89
Mercury electrode
The direct electrochemistry of cytochrome *c* at a hanging mercury drop electrode modified with 6-mercaptopurine 89
Metal complexation
Electrochemical extraction of heavy metal ions assisted by cyclic thioether ligands 29
Metallothionein-related peptide
Electrochemical study of a metallothionein related peptide in the presence of zinc using cyclic voltammetry 267
Methylene groups
Self-assembly and catalytic properties of 1,1′-bridged-2,2′-dipyridinium amphiphiles 39
Microelectrodes
Electrochemical nucleation on microelectrodes. Theory and experiment for diffusion-controlled growth 101

Na^+
Ion pair formation between the electrogenerated 2,3-dichloro-5,6-dicyano-1,4-benzoquinone dianion and the sodium ion at platinum surfaces 193
Nine-member square scheme
Kinetics of redox conversion at a gold electrode of water-insoluble ubiquinone ($UQ_{(10)}$) and plastoquinone ($PQ_{(9)}$) incorporated in supported phospholipid layers 139
Nitric oxide
Electrocatalytic reduction of NO on metal electrodes and gas diffusion electrodes in an aqueous electrolyte 181
Nitrite
Electrochemical and electrocatalytic properties of iridium(IV)-substituted Dawson type polyoxotungstate 49
N-substituted pyrroles
Immobilisation at an electrode surface of calix[4]arenes bearing electropolymerisable pyrrole moieties at the upper rim 261
Nucleation
Electrochemical nucleation on microelectrodes. Theory and experiment for diffusion-controlled growth 101
Nyquist impedance diagram
An ac impedance study of the anodic dissolution of iron in sulfuric acid solutions containing hydrogen sulfide 11

Ohmic potential drop
Bifurcation to limit cycle oscillations induced by the ohmic potential drop during the anodic polarisation of iron in 14.8 M H_3PO_4 77

Permselective membrane
A preliminary study of room temperature direct ethyl formate fuel cells for consumer electronic applications 1
Phenol
A voltammetric and FTIR–ATR study of the electropolymerization of phenol on platinum electrodes in carbonate medium: Influence of sulfide 163
Platinum
A voltammetric and FTIR–ATR study of the electropolymerization of phenol on platinum electrodes in carbonate medium: Influence of sulfide 163
Platinum cathode
On the cathodic behaviour of tetraalkylammonium cations at a platinum electrode 5
Platinum electrodes
Ion pair formation between the electrogenerated 2,3-dichloro-5,6-dicyano-1,4-benzoquinone dianion and the sodium ion at platinum surfaces 193
Poisoning
A preliminary study of room temperature direct ethyl formate fuel cells for consumer electronic applications 1
Polarization curve
An ac impedance study of the anodic dissolution of iron in sulfuric acid solutions containing hydrogen sulfide 11
Polyaniline
Electrooxidation of ethylene glycol on a platinum doped polyaniline electrode 95
Polylayer formation
A molecular model for polylayer formation on electrode surfaces 249
Potential cycling
Incorporation and expulsion of electrolyte species by tungsten trioxide-, WO_3 | Polyaniline-, and WO_3 | PAn | polyvinylsulfate-confined electrodes during potential cycling 219

Quantum chemistry
Coupled chemistry revisited in the tentative cathodic electropolymerization of 2-butenenitrile 145
Quinones
Continuous-flow column electrolytic spectroelectrochemistry for two-step one-electron transfer reactions 229

Redox electrodes
On the theory of the coulostatic pulse technique as applied to redox electrodes with two consecutive charge transfer steps 19
Reduction potential
Self-assembly and catalytic properties of 1,1′-bridged-2,2′-dipyridinium amphiphiles 39
Reflection spectroscopy
A voltammetric and FTIR–ATR study of the electropolymerization of phenol on platinum electrodes in carbonate medium: Influence of sulfide 163
Room temperature fuel cell
A preliminary study of room temperature direct ethyl formate fuel cells for consumer electronic applications 1

Self-assembly
Self-assembly and catalytic properties of 1,1′-bridged-2,2′-dipyridinium amphiphiles 39

Signal-to-background ratio
A unified approach to trace analysis and evaluation of electrode kinetics with fast Fourier transform electrochemical instrumentation 129
Signal-to-noise ratio
A unified approach to trace analysis and evaluation of electrode kinetics with fast Fourier transform electrochemical instrumentation 129
Simulation
Spatial distribution of electrochemically deposited clusters: a simulation study 211
Solvent effects
Coupled chemistry revisited in the tentative cathodic electropolymerization of 2-butenenitrile 145
Spatial distribution
Spatial distribution of electrochemically deposited clusters: a simulation study 211
Spectroelectrochemistry
Continuous-flow column electrolytic spectroelectrochemistry for two-step one-electron transfer reactions 229
The surface-enhanced Raman spectroelectrochemical study on the interaction between β-cyclodextrin and the electrochemically generated radical intermediate of flavin 187
Spectroscopic
Electrochemical, spectroscopic and structural investigations of the Cd|Cd(II) system in alkaline media. I. Cation effects 237
Structural
Electrochemical, spectroscopic and structural investigations of the Cd|Cd(II) system in alkaline media. I. Cation effects 237
Structural variations
In situ study of polypyrrole morphology by STM: effect of the doping state 273
Sulfide
A voltammetric and FTIR–ATR study of the electropolymerization of phenol on platinum electrodes in carbonate medium: Influence of sulfide 163
Supported bilayer
Kinetics of redox conversion at a gold electrode of water-insoluble ubiquinone ($UQ_{(10)}$) and plastoquinone ($PQ_{(9)}$) incorporated in supported phospholipid layers 139
Surface-enhanced Raman spectroscopy
The surface-enhanced Raman spectroelectrochemical study on the interaction between β-cyclodextrin and the electrochemically generated radical intermediate of flavin 187
Tetraalkylammonium reduction
On the cathodic behaviour of tetraalkylammonium cations at a platinum electrode 5
Thio-crown ligands
Electrochemical extraction of heavy metal ions assisted by cyclic thioether ligands 29
Facilitated ion transfer reactions across oil|water interfaces: Part II. Use of the convoluted current for the calculation of the association constants and for an amperometric determination of the stoichiometry of ML_j^{z+} complexes 59
Two-step one-electron transfer
Continuous-flow column electrolytic spectroelectrochemistry for two-step one-electron transfer reactions 229
Ubiquinone
Kinetics of redox conversion at a gold electrode of water-insoluble ubiquinone ($UQ_{(10)}$) and plastoquinone ($PQ_{(9)}$) incorporated in supported phospholipid layers 139
Voltammetry
A voltammetric study on the formation of V(V)- and V(IV)-substituted molybdophosphate(V) complexes in aqueous solution 203
V-substituted Keggin anions
A voltammetric study on the formation of V(V)- and V(IV)-substituted molybdophosphate(V) complexes in aqueous solution 203
Water|1,2-dichloroethane interphase
Facilitated alkali ion transfer at the water|1,2-dichloroethane interphase: ab initio calculations concerning alkaline metal cation–1,10-phenanthroline complexes 111
WO3-, PAn-, PVS-confined electrodes
Incorporation and expulsion of electrolyte species by tungsten trioxide-, WO_3 | Polyaniline-, and WO_3 | PAn | polyvinylsulfate-confined electrodes during potential cycling 219
Zinc
Electrochemical study of a metallothionein related peptide in the presence of zinc using cyclic voltammetry 267
